

## tea 1500N e 2000N

Characterized by robustness and precision, the TEA 1500N and 2000N transplanters are ideal for growers that need to carry out large volumes of work. The bridge, that moves parallel to the direction of advancement of the trays, is mounted on two parallel guides, conferring the machine solidity and precision. The grippers are individually motorized and it is possible to pick up the plants from the side. If the pattern of the cells of the destination tray does not allow the use of all the grippers, the machine signals it and "parks" the excess grippers on the side. The machine parameters and the programs entered can be saved on a USB memory.

Characteristics	1500N	2000N
Machine dimensions (LxLxH)	cm 220x320x220	cm 226x420x220
Weight	kg 700	kg 600
Power	kW 1	kW 1
Voltage	Volt 220/100	Volt 220/100
Air consumption	l/min 80	l/min 80
Nr. grippers	max. 12	max. 16
Productivity	plant/hour for each gripper 1000 – 1200	plant/hour for each gripper 1000 – 1200
Pick up tray management	max. 2 trays	max. 3 trays
Max. tray dimensions	cm 40x60	cm 40x60
